

**THE DATASHEET OF  
SS411A-L**

## Bipolar, Latching, and Unipolar Hall-effect Digital Position Sensor ICs: SS400 Series, SS500 Series

**32320997**

Issue B

Datasheet

### DESCRIPTION

The SS400 Series and SS500 Series are small and versatile digital Hall-effect devices that are operated by the magnetic field from a permanent magnet or an electromagnet, and are designed to respond to alternating North and South poles, or to a South pole only. They are available in bipolar, latching or unipolar magnetics. On-board regulation provides stable operation over a 3.8 Vdc to 30 Vdc supply voltage range. These sensors are capable of continuous 20 mA sinking output and may be cycled as high as 50 mA max. The 3.8 V capability allows for use in many potential low voltage applications. The digital, open collector sinking-type output is easily interfaced with a wide variety of electronic circuits. To provide reliable products and consistent quality, the SS400 Series products are tested at both 25°C [75°F] and 125°C [257°F]. All catalog listings are qualified for operation up to 150°C [302°F]. For design flexibility, these product are available in the following package styles:

- **SS400 Series:** Flat TO-92-style:
  - **SS4XX:** Straight standard leads, bulk pack
  - **SS4XX-L:** Straight long leads, bulk pack
  - **SS4XX-T2:** Formed leads, ammopack tape-in-box
  - **SS4XX-T3:** Straight standard leads, ammopack tape-in-box
  - **SS4XX-S:** Surface mount, bulk pack
  - **SS4XX-SP:** Surface mount, pocket tape and reel
- **SS500 Series:** SOT-89B, pocket tape and reel

### FEATURES

- Quad Hall IC design minimizes mechanical stress effects
- Temperature-compensated magnetics help provide stable operation over a wide temperature range of -40°C to 150°C [-40°F to 302°F]
- Broad, inclusive supply voltage capability from 3.8 Vdc to 30 Vdc for application flexibility
- Digital, open collector sinking output for easy interfacing with a variety of common electronic circuits
- High sensitivity versions available for potential applications requiring high accuracy or wide gaps
- Bipolar, latching or unipolar magnetics

### POTENTIAL APPLICATIONS

- **Industrial:** Speed and RPM (revolutions per minute) sensing, tachometer, counter pickup, flow-rate sensing, brushless dc (direct current) motor commutation, motor and fan control, robotics control
- **Transportation:** Speed and RPM (revolutions per minute) sensing, tachometer, counter pickup, motor and fan control, electric window lift, convertible roof position
- **Medical:** Motor assemblies, medication dispensing control

### PORTFOLIO

Other bipolar, latching and unipolar Hall-effect digital sensor ICs include:

- SS360NT, SS360ST, SS360ST-10K, SS460S, SS460S-T2
- VF360NT, VF360ST, VF460S
- SS361RT, SS461R
- SS361CT, SS461C
- SS340RT, SS440R Series
- SS360PT, SS460P, SS460P-T2
- SS311PT, SS411P

# Bipolar, Latching, or Unipolar Hall-effect Digital Sensor ICs: SS400 Series, SS500 Series

**Table 1. Performance Specifications (Applies to both SS400 series and 500 Series, unless otherwise noted.)**

Characteristic	Condition	Min.	Typ.	Max.	Unit
Supply voltage ( $V_s$ ) <sup>1</sup>	—	3.8	—	30	Vdc
Rated sinking current ( $I_{sink}$ )	—	—	20	—	mA
Current consumption:					
on:					
SS400 Series	$V_s = 30 \text{ Vdc}$ , $I_{sink} = 20 \text{ mA}$ , $-40^\circ\text{C} < T < 150^\circ\text{C}$ , B > operate max.	—	—	10.0	mA
SS500 Series	$V_s = 30 \text{ Vdc}$ , $-40^\circ\text{C} < T < 150^\circ\text{C}$ , B > operate max.	—	—	10.0	
off:					
SS400 Series	$V_s = 30 \text{ Vdc}$ , $I_{sink} = 20 \text{ mA}$ , $-40^\circ\text{C} < T < 150^\circ\text{C}$ , B > operate max.	—	—	9.0	mA
SS500 Series	$V_s = 30 \text{ Vdc}$ , $I_{sink} = 20 \text{ mA}$ , $-40^\circ\text{C} < T < 150^\circ\text{C}$ , B > release min.	—	—	10.0	
$V_{sat}$ :					
SS400 Series	$V_s = 3.8 \text{ Vdc}$ , $I_{sink} = 20 \text{ mA}$ , B > operate max.	—	—	0.4	V
SS500 Series	$V_s = 3.8 \text{ Vdc}$ , B > operate max.	—	—	0.4	
Output leakage current:					
SS400 Series	$V_s = 24 \text{ V}$ , $V_{out} = 30 \text{ V}$ , B < release min.	—	—	0.4	uA
SS500 Series	—	—	—	10.0	
Output switching time:					
rise	$V_s = 12 \text{ V}$ , $R_L = 1.6 \text{ k}\Omega$ , $C_L = 20 \text{ pF}$ , $T = 25^\circ\text{C}$ [77°F]	—	—	1.5	us
fall	$V_s = 12 \text{ V}$ , $R_L = 1.6 \text{ k}\Omega$ , $C_L = 20 \text{ pF}$ , $T = 25^\circ\text{C}$ [77°F]	—	—	1.5	
Operating temperature	—	-40[-40]	—	150[302]	°C [°F]
Storage temperature	—	-50[-58]	—	150[302]	°C [°F]
Soldering temp. and time:					
SS400 Series	wave soldering process: $250^\circ\text{C}$ to $260^\circ\text{C}$ [482°F to 500°F] for 3 s max.				
SS500 Series	infrared reflow process: peak temperature $245^\circ\text{C}$ [473°F] for 10 s max.				

<sup>1</sup>For supply voltages above 24 Vdc, a capacitor may be needed between the output and supply pins to ensure proper operation.

## NOTICE

These Hall-effect sensor ICs may have an initial output in either the ON or OFF state if powered up with an applied magnetic field in the differential zone (applied magnetic field  $>B_{rp}$  and  $<B_{op}$ ). Honeywell recommends allowing 10 us after supply voltage has reached 5 V for the output voltage to stabilize.

## NOTICE

The magnetic field strength (Gauss) required to cause the switch to change state (operate and release) will be as specified in the magnetic characteristics. To test the switch against the specified limits, the switch must be placed in a uniform magnetic field.

**Figure 1. Circuit Diagram**

# Bipolar, Latching, or Unipolar Hall-effect Digital Sensor ICs:

**Table 2. Absolute Maximum Specifications**

Characteristic	Min.	Typ.	Max.	Unit
Supply voltage ( $V_s$ )	-1	—	30	V
Applied output voltage ( $V_{out}$ ): SS400 Series	-0.5	—	30	V
SS500 Series (off)	—	—	30	
Output current ( $I_{sink}$ ): $V_s = -1$ Vdc to 24 Vdc	—	—	50	mA
$V_s = 24$ Vdc to 25 Vdc	—	—	37	
$V_s = 25$ Vdc to 26 Vdc	—	—	33	
$V_s = 26$ Vdc to 27 Vdc	—	—	28	
$V_s = 27$ Vdc to 28 Vdc	—	—	24	
$V_s = 28$ Vdc to 29 Vdc	—	—	19	
$V_s = 29$ Vdc to 30 Vdc	—	—	15	
Magnetic flux	—	—	no limit	Gauss

## NOTICE

Absolute maximum ratings are the extreme limits the device will momentarily withstand without damage to the device. Electrical and mechanical characteristics are not guaranteed if the rated voltage and/or currents are exceeded, nor will the device necessarily operate at absolute maximum ratings.

## ADDITIONAL INFORMATION

The following associated literature is available on the Honeywell web site at [sensing.honeywell.com](http://sensing.honeywell.com):

- Product Line Guide
- Product Range Guide
- Selection Guides
- Application-specific Information

### **⚠ WARNING** **PERSONAL INJURY**

DO NOT USE these products as safety or emergency stop devices or in any other application where failure of the product could result in personal injury.

**Failure to comply with these instructions could result in death or serious injury.**

### **⚠ WARNING** **MISUSE OF DOCUMENTATION**

- The information presented in this datasheet is for reference only. Do not use this document as a product installation guide.
- Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.

**Failure to comply with these instructions could result in death or serious injury.**

### **Warranty/Remedy**

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship during the applicable warranty period. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgment or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items that Honeywell, in its sole discretion, finds defective.

**The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.**

While Honeywell may provide application assistance personally, through our literature and the Honeywell web site, it is buyer's sole responsibility to determine the suitability of the product in the application. Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this writing. However, Honeywell assumes no responsibility for its use.
