The Class II PBL500 series of AC-DC switching power supplies, in a package of just 4 x 7 x 1.56 inches, deliver 450-500 watts of continuous power with forced air cooling or 250 watts with convection cooling. The units are constructed on a U-Channel for mechanical support and heat sinking. A cover and fan assembly can be added during manufacturing. They are designed for medical applications including those needing BF rated insulation with an operation altitude up to 5000 meters.

2. 250 W without moving air or 450-500 W with 30 CFM forced air provided by the user. 450-500 W for '-C' version
3. Ripple and noise is the maximum peak-to-peak voltage value measured at the output with 20 MHz bandwidth, at rated line voltage and output load, and with a 10  $\mu$ F tantalum capacitor in parallel with a 0.1  $\mu$ F ceramic capacitor.
