ITT

ENGINEERED FOR LIFE

We Connect

When it matters most

For more than a century, ITT Cannon has developed innovative interconnect solutions for the world's harshest environments. With facilities in the United States, Germany, Italy, Mexico, China and Japan, each with its unique strengths, we offer our customers interconnect solutions that are truly Engineered for Life.

In addition to this truly global footprint, we offer highly specialized, segmented industry expertise. We have a proven track record as an industry leader in harsh-environment applications. This has equipped us with the knowledge needed to continue to produce the most resilient, reliable connectors for our customers' most challenging conditions.

Interconnect solutions for the harshest environments.

The ITT Cannon difference

- Global capabilities & local support
- Proven application expertise
- A century of interconnect leadership
- A committed innovator & business partner

The logo for Cannon, featuring the word "cannon" in a lowercase, sans-serif font. The letter "o" is replaced by a stylized icon of a gun barrel with three bullet holes.

About ITT

ITT is a diversified leading manufacturer of highly engineered critical components and customized technology solutions for the energy, transportation and industrial markets. Building on its heritage of innovation, ITT partners with its customers to deliver enduring solutions to the key industries that underpin our modern way of life. Founded in 1920, ITT is headquartered in White Plains, N.Y., with employees in more than 35 countries and sales in a total of approximately 125 countries. For more information, visit www.itt.com.

Industrial / Instrumentation

Defense Vehicles

Medical

Heavy Equipment

Rail

Oil & Gas

Commercial & Military Aerospace

Our connector portfolio remains the most extensive

in the industry, offering a reliable and cost effective range of interconnect solutions

Introduction to KPSE / KPT / KPTC

ITT Cannon's KPSE / KPT and KPTC series of miniature positive bayonet locking connectors offer a range of high-density signal solutions. They are designed according to MIL-DTL-26482 Series I or VG95328 – details below. Next to the original use in military vehicles these connector series have become a standard for Industrial uses as eg. off-road vehicles, sensors, factory equipment and other heavy industry applications.

All three product lines have specific characteristics and provide a set of unique variants, however, all lines are fully intermateable with each other as well as any other connector series designed to MIL-DTL 26482 Series I or VG95238 standards.

| Product Series | Origin | VG 95328 Approved | MIL-DTL 26482 Series I Approved |
|----------------|--------------------|-------------------|---------------------------------|
| KPSE | German make/origin | Yes | No |
| KPSE | US make/origin | No | No |
| KPT | German make/origin | No | No |
| KPT | US make/origin | No | No |
| KPTC | German make/origin | No | No |

KPSE is the high-performance crimp contact solution featuring a clip-in retention system for fast and simple assembly. ITT Cannon is approved to offer this line with VG marking according to VG95328.

KPT is the first of two general duty series, and equipped with solder pot contacts and glued in contacts. This makes this product ideal for any prototype solution as well as for military vehicle applications based on the MIL-DTL-268482 Series I standard.

KPTC is the second ITT Cannon general duty series with either crimp or solder pot contact versions. In comparison this series comes with a simpler design and avoids the high-performance clip-in solution of KPSE as well as the glued contact assembly of KPT which makes this line a good choice for many Industrial applications.

Both KPTC as well as KPT add typical Industrial back shells to their portfolio.

Common features of KPSE / KPT / KPTC:

- ▶ Intermateability with all product lines designed to MIL-DTL-26482 Series I
- ▶ Environmental sealing to IP67 and IP68
- ▶ ½ turn positive bayonet coupling for quick mating & unmating
- ▶ Shielded backshell accessories
- ▶ A range of RoHS compliant plating alternatives to Cadmium including Nickel, Zinc Nickel and Zinc Cobalt versions
- ▶ Customizing options

This document solely applies to European manufactured KPT / KPSE / KPTC products.

Contact Principle

CONTACT & SEALING PRINCIPLE

KPSE uses a three piece insulator stack up consisting of

- 1 - rubber insulator
- 2 - plastic wafer / retaining clips
- 3 - rubber grommet to seal individual wires
- 4 - two piece machined contact with retaining clip

Rubber insulator (1) and grommet (3) together with the front sealing ring provide the sealing in mated condition as well as the sealing of individual wires protruding through the grommet.

Contact retention is provided using a two piece contact with retaining clip. The stiff plastic wafer or individual metal clips provide the specified contact retention. A good tactile response is given when contacts are pushed in the final assembly position.

Contacts are installed from the rear by hand or with an insertion tool to ease assembly. Contact removal is done with an extraction tool from the front.

KPT uses a rubber insulator and sealing grommet

- 1 - rubber insulator
- 2 - rubber grommet to seal individual wires
- 3 - one piece machined contact

Rubber insulator (1) and grommet (2) together with the front sealing ring provide the sealing in mated condition as well as the sealing of individual wires protruding through the grommet.

Contact retention is provided by form fit of the machined contact in the rubber insulator. Additionally, glue is applied to secure contacts in the exact mounting position. KPT is equipped with solder pot contacts only and pre installed by the factory.

KPTC uses a rubber insulator and sealing grommet

- 1 - rubber insulator
- 2 - rubber grommet to seal individual wires
- 3 - one piece machined contact

Rubber insulator (1) and grommet (2) together with the front sealing ring provide the sealing in mated condition as well as the sealing of individual wires protruding through the grommet.

Contact retention is provided by form fit of the machined contact in the rubber insulator. Solder pot contacts are pre-installed by the factory, crimp contacts are delivered separately. Glue is not applied to KPTC connectors.

Contacts are installed from the rear with an insertion tool. Contact removal is done with an extraction tool from the front.

How to use

This catalog is split in several sections that help you to

- get a general overview of all product lines (product overview)
- create a product part number step by step (ordering reference)
- get all required detail information (dimensions, product details)
- get all required support products (accessories, tooling)

The fastest way to find your product of choice is to follow these steps

1 **Select your product** using the “ordering reference” option

3 **Add accessories and tooling** as required on the related pages

2 **Use the detail pages** to better understand the available options and choose the best solution for your needs

4 **Use the contact information** on the back cover to contact us for further questions or to get advice on where you can purchase our products

Product overview KPSE (VG95328), KPT, KPTC

Electrical Data

Contact rating at 60°C:

| Size | Rated current A | Test current A | Millivolt drop mV |
|------|-----------------|----------------|-------------------|
| 20 | 7,5 | 7,5 | Less than 50 |
| 16 | 13,0 | 13,0 | Less than 50 |

Current rating vs. ambient temperature:

Comment for contact rating and current rating:

Rated current values shown are the max. current flowing continuously (not intermittently) through one contact pair with the same cross section with regard to ambient temperature. If multiple contact pairs are loaded into a connector the current rating curve has to be reduced.

Minimum air & creepage paths:

| | Contact to contact crimp | Contact to contact solder | Contact to shell |
|-----------------|--------------------------|---------------------------|------------------|
| Service Class 1 | 1,9 mm | 0,75 mm | 1,0 mm |
| Service Class 2 | 2,8 mm | 1,53 mm | 2,8 mm |

Insulation resistance: ~ 5000 MOhm

Operating voltage:

| Service class | VG95328 | MIL-C-26482 |
|---------------|-----------------|-------------------|
| 1 | 140 VDC/100 VAC | 850 VDC/600 VAC |
| 2 | 165 VDC/115 VAC | 1400 VDC/1000 VAC |

Comment: When connectors in this catalog are used at voltages exceeding > 50VAC / 75VDC safety provisions as defined in the European low voltage directive 2014/35/EU have to be adhered to. For use in other regions see appropriate local regulations.

Test voltage:

| Test voltage | Service class | Vrms | VDC |
|-------------------|---------------|------|------|
| Service Class 1 | 1 | 1500 | 2100 |
| | 2 | 2300 | 3200 |
| 21336 M/70,000ft. | 1 | 375 | 535 |
| | 2 | 550 | 770 |

Mechanical data

Ambient temperature: -55°C ... 125°C

Environmental sealing:

| | |
|---|---------------------------------|
| In mated condition for KPSE, KPT and KPTC product lines: | IP67 acc. ISO 20653 |
| VG95328 connectors: | IP68 (0,2bar / 48h) – see below |
| According to VG95319 Part 2, Test No. 5.9.2 For styles A to E and Z1, Z2 and Z3 and gaskets style A only, test pressure 0,2 bar overpressure, test duration 48h, test temperature 25±3°C, connector shall be free of moisture | |

Vibration test acc. VG95328:

Vibration stress 150 m/s², 10 Hz to 2000 Hz
and Random vibration stress, 5 Hz to 500 Hz acc. test 5.52 VG95328-1

Mating cycles: 500

Material:

| | |
|-------------------|--|
| Shell | Aluminium alloy |
| Shell finishes | - Cadmium, VG approved - ZnCobalt Black - Zinc Cobalt Green - Zinc Nickel Blue Generation, for non-shielded versions - Nickel |
| Insulator | Polychloroprene |
| Grommet and seals | |
| Contacts | Copper alloy, gold and silver plating |

Product line design principles:

KPSE: Clip in crimp contact system, VG approved versions

KPT: Solder contacts, pre-installed and fixed with glue, VG approved versions

KPTC: Crimp contacts for tool insertion OR pre-installed solder contacts (not fixed with glue)

All further details, product line options etc. see following catalog pages

How to order

Cannon Order reference

KPT / KPSE / KPTC

KP.. 02 E 22 - 36 P W *

| | |
|---|----------------|
| Series | |
| KPSE – Cannon prefix crimp, contacts supplied | KP.. |
| KPT – Cannon prefix solder, contacts installed | |
| KPTC – Cannon prefix commercial version, contacts to be ordered separately. See modification codes for contact options | |
| Shell type (See note below) | |
| Cannon designation omit 0 in case of a mod code and KPTC | |
| 00 – wall mounting receptacle | see page 18-20 |
| 01 – cable connecting plug | see page 21-23 |
| 02 – box mounting receptacle (class E only). | see page 23-24 |
| 06 – straight plug | see page 24-27 |
| 07 – jam nut receptacle | see page 28-30 |
| 08 – 90° angle plug | see page 31 |
| KPTB - thru-bulkhead receptacle | see page 24 |
| Class | |
| A – Endbell with thread, no grommet seal; for jam nut: without endbell | E |
| E – Pressure nut and grommet seal - for 90° versions: endbell with thread, and grommet seal – with modification DN: Endbell for heat shrink boot and grommet seal – with modification DZ: Endbell for heat shrink boot and grommet seal, shielded | |
| F – Endbell with cable clamp and grommet seal | |
| PG – endbell for PG glands | |
| ME – endbell for metric glands | |
| | |
| Shell size | |
| 8 – 24 | 22 - 36 |
| Contact arrangement | see page 14-16 |
| Contact type | |
| P – pin | P |
| S – socket | |
| Alternate insert position | |
| W, X, Y and Z (omit for normal position) | W |
| Modification | see page 12 |
| | * |

Note:

* If a modification is used the initial ,0' in the shell style description is omitted e.g. KPT01E10-6P is changed to KPT1E10-6P-DN.
KPTC series does not use the initial ,0' e.g. KPTC6E10-6P-C.

Modification Codes

| KPT: | |
|---|-------|
| Multiple codes can be used in order of listing below: | |
| Contact | |
| PCB solder pin 0,76 x 7mm (style 02 and 07 only) | EX |
| PCB solder pin 0,6 x 7mm (style 02 and 07 only) | EW |
| Endbell | |
| heat shrink boot adapter, grommet seal | DN |
| shielded, heat shrink boot adapter, grommet seal | DZ |
| without endbell, grommet and ferrule | F42* |
| Endbell for PG cable gland, class PG only | |
| PG09 thread for connectors with shell size 10 | P9 |
| PG11 thread for connectors with shell size 12 | P11 |
| PG13,5 thread for connectors with shell size 14 | P13,5 |
| PG16 thread for connectors with shell size 16 | P16 |
| PG21 thread for connectors with shell size 18, 20, 22 | P21 |
| PG29 thread for connectors with shell size 24 | P29 |
| Endbell for Metric cable gland, class ME only | |
| M12 thread for connectors with shell size 10 | M12 |
| M16 thread for connectors with shell size 12 | M16 |
| M20 thread for connectors with shell size 16 | M20 |
| M25 thread for connectors with shell size 18, 20 | M25 |
| M32 thread for connectors with shell size 22, 24 | M32 |
| Plating (Cadmium with olive drab chromate plating is standard - without code; Alternative platings below) | |
| Zinc Cobalt, black plating (RoHS compliant) | A232 |
| Zinc Nickel plating (RoHS compliant) (not for code DZ) | A240 |
| Zinc Cobalt, green plating (RoHS compliant) | A233 |
| Nickel plating (RoHS compliant) | A34 |

An example using these modifications:
KPT2E10-6P-EW-A232

* Note: Modification -F42 can only be used with Styles 0, 1, 6, 7 and 8. See details on pg 13

| KPSE: | |
|---|-------|
| Multiple codes can be used in order of listing below: | |
| Endbell | |
| heat shrink boot adapter, grommet seal | DN |
| shielded, heat shrink boot adapter, grommet seal | DZ |
| without endbell, grommet and ferrule | F42* |
| Endbell for PG cable gland, class PG only | |
| PG09 thread for connectors with shell size 10 | P9 |
| PG11 thread for connectors with shell size 12 | P11 |
| PG13,5 thread for connectors with shell size 14 | P13,5 |
| PG16 thread for connectors with shell size 16 | P16 |
| PG21 thread for connectors with shell size 18, 20, 22 | P21 |
| PG29 thread for connectors with shell size 24 | P29 |
| Endbell for Metric cable gland, class ME only | |

| PCB solder pin 0,6 x 7mm (style 02 and 07 only) | EW |

An example using these modifications:
KPTC6F14-18P-H-MB

* Note: Modification -F42 can only be used with Styles 0, 1, 6, 7 and 8. See details on pg 13

Endbell Modification -F42

Below table shows the different threads that come with the respective shell sizes when choosing the modification -F42 (no endbell/grommet seal).

This modification is only applicable to styles 0 (wall mounting receptacle), 1 (cable connecting plug), 6 (straight plug), 7 (jam nut receptacle) and 8 (90° angle plug). The only exception being KP*7A, as this combination already has no endbell/grommet.

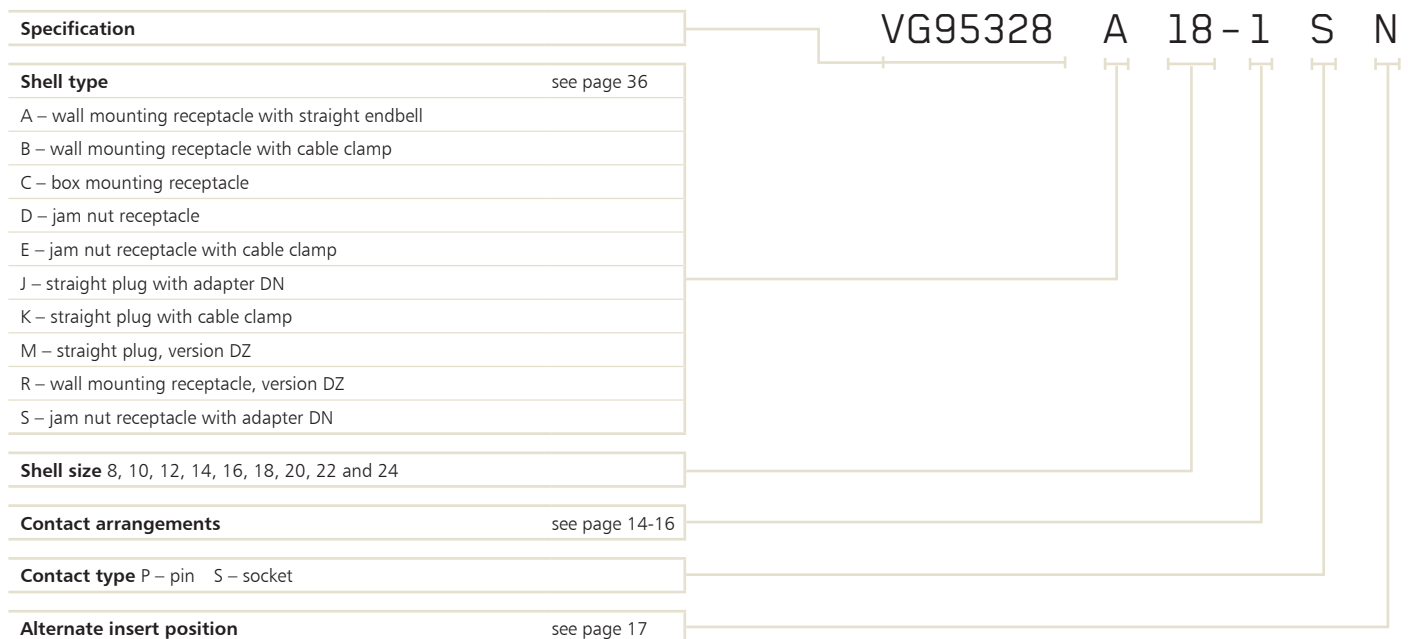

| Shell size | Thread |

HOW TO ORDER

PROTECTIVE CAPS KPT/KPSE/KPTC

Cap with end link (not assembled)

For receptacle

KPT81 termination D
VG95328 Z1 termination C

For plug

KPT80 termination D
VG95328 Z2 termination C

Cap with terminal link

For receptacle

KPT81 termination C (with chain) and CB (with nylon cord)
VG95328 Z1 termination A (with chain)

For plug

KPT80 termination C (with chain) and CB (with nylon cord)
VG95328 Z2 termination A (with chain)

Cap with ring

For receptacle

KPT81 termination N (with chain) and NB (with nylon chord)
VG95328 Z3 termination C (with nylon cord)

DUMMY RECEPTACLES KPT/KPSE/KPTC

HOW TO ORDER

Below the order reference for Dummy Receptacles KPT series (can be mated with KPSE or KPTC connectors) and separately for VG95328. The table contains the available shell sizes with their respective dimensions.

| Shell size | $\varnothing A$ +0,03-0,13 | K $\pm 0,4$ | M $\pm 0,15$ | R $\pm 0,15$ | S max. | $\varnothing T$ $\pm 0,15$ |
|------------|-------------------------------|----------------|-----------------|-----------------|-----------|-------------------------------|
| KPT-15-8A | 12,00 | 1,6 | 12,1 | 15,1 | 21,0 | 3,05 |
| KPT-15-10A | 15,00 | 1,6 | 12,1 | 18,3 | 24,2 | 3,05 |
| KPT-15-12A | 19,05 | 1,6 | 12,1 | 20,6 | 26,6 | 3,05 |
| KPT-15-14A | 22,23 | 1,6 | 12,1 | 23,0 | 29,0 | 3,05 |
| KPT-15-16A | 25,40 | 1,6 | 12,1 | 24,6 | 31,3 | 3,05 |
| KPT-15-18A | 28,58 | 1,6 | 12,1 | 27,0 | 33,7 | 3,05 |

CROSS REFERENCE LIST KPT/KPSE/VG95328/MIL-C-26482

All three product lines have specific characteristics and provide a set of unique variants, however, all lines are fully intermateable with each other as well as any other connector series designed according to MIL-DTL 26482 Series I or VG95238 standards.

Hand crimping tool M22520/1-01 and Locator: Order No.: 995-0001-585

This universal tool features just one crimp locator with different adjustments for crimping contacts. The tool provides an 8-indent crimp.

Note: The locator needs to be purchased separately:

| Descripton Locator | Name | Order-No. | Contact Size |
|--------------------|-----------------|--------------|--------------|
| M22520/1-02 | Locator | 995-0001-736 | 12 |
| | | | 16 |
| | | | 20 |
| M22520/1-01 | Hand Crimp Tool | 995-0001-585 | |

Pneumatic crimping tool WA27F-CE:

Pneumatic operated crimp tool for higher volume production. A pedal for foot operation can also be provided.

The tool provides an 8-indent crimp equivalent to hand crimping tool.

Crimp tool and Bench mount

Foot pedal

Gauge

| Description | Name | Order No. |
|--|------------|--------------|
| Pneumatic crimp tool (AWG12-20) | WA27F-CE | 121586-5067 |
| Bench mount | BM-2A | 121586-5068 |
| Foot pedal | WA10A | 121586-5069 |
| Gauge | M22520-3-1 | 995-0001-684 |

Insertion Tools

To insert crimped contacts into the insulator insertion tools are required.

KPSE

Insertion Tool

Pipe Wrench

Soft Jaw Adjustable Pliers for tightening the endbell housing.
Order No.: 550014-1644

Dimensions for Single Conductor and Wire Stripping

In order to assure proper function according to connector specification, especially concerning water tightness, the diameter of the wire insulation must correlate with the following data:

KPSE

| Contact Size | Conductor dimensions | | Insulation dimensions Waterproof / Ø mm | |
|--------------|----------------------|-----------------|--|------|
| | AWG | mm ² | min. | max. |
| 20 | 24 - 18 | 0,2 – 0,75 | 1.3 | 2.1 |
| 16 | 20 - 14 | 0,5 – 2,0 | 1.8 | 2.7 |
| 12 | 14 - 12 | - | 2.5 | 3.4 |

KPTC

| Contact Size | Conductor dimensions | | Insulation dimensions Waterproof / Ø mm | |
|--------------|----------------------|-----------------|--|------|
| | AWG | mm ² | min. | max. |
| 20 | 24 - 18 | 0,2 – 0,75 | 1.4 | 2.15 |
| 16 | 20 - 14 | 0,5 – 2,0 | 1.6 | 2.7 |

Contacts

KPTC

| Contact size | Termination | | Contact type | For shell size 8 and contact layout 12 – 14 only | |

|--------------|------------------|--|--------------|-------------------------|
| | Cable type | | | |
| Coaxial | RG187/U, RG188/U | | Receptacle | DM 53742-5001 |
| | | | Plug | DM 53740-5001 |

PRODUCT SAFETY INFORMATION

1. MATERIAL CONTENT AND PHYSICAL FORM

Electrical connectors do not usually contain hazardous materials. They contain conducting and non-conducting materials and can be divided into two groups.

- a) Printed circuit types and low cost audio types which employ all plastic insulators and casings.
- b) Rugged, Fire Barrier and High Reliability types with metal casings and either natural rubber, synthetic rubber, plastic or glass insulating materials. Contact materials vary with type of connector and also application and are usually manufactured from either: Copper, copper alloys, nickel, alumel, chromel or steel. In special applications, other alloys may be specified.

2. FIRE CHARACTERISTICS AND ELECTRIC SHOCK HAZARD

There is no fire hazard when the connector is correctly wired and used within the specified parameters.

Incorrect wiring or assembly of the connector or careless use of metal tools or conductive fluids, or transit damage to any of the component parts may cause electric shock or burns. Live circuits must not be broken by separating mated connectors as this may cause arcing, ionization and burning. Heat dissipation is greater at maximum resistance in a circuit. Hot spots may occur when resistance is raised locally by damage, e.g. cracked or deformed contacts, broken strands of wire. Local overheating may also result from the use of the incorrect application tools or from poor quality soldering or slack screw terminals.

Overheating may occur if the ratings in the product Data Sheet/ Catalog are exceeded and can cause breakdown of insulation and hence electric shock. If heating is allowed to continue it intensifies by further increasing the local resistance through loss of temper of spring contacts, formation of oxide film on contacts and wires and leakage currents through carbonization of insulation and tracking paths. Fire can then result in the presence of combustible materials and this may release noxious fumes. Overheating may not be visually apparent. Burns may result from touching overheated components.

3. HANDLING

Care must be taken to avoid damage to any component parts of electrical connectors during installation and use. Although there are normally no sharp edges, care must be taken when handling certain components to avoid injury to fingers.

Electrical connectors may be damaged in transit to the customers, and damage may result in creation of hazards. Products should therefore be examined prior to installation/use and rejected if found

to be damaged.

4. DISPOSAL

Incineration of certain materials may release noxious or even toxic fumes.

5. APPLICATION

Connectors with exposed contacts should not be selected for use on the current supply side of an electrical circuit, because an electric shock could result from touching exposed contacts on an unmated connector. Voltages in excess of 30V ac or 42.5V DC are potentially hazardous and care should be taken to ensure that such voltages cannot be transmitted in any way to exposed metal parts of the connector body. The connector and wiring should be checked, before making live, to have no damage to metal parts or insulators, no solder blobs, loose strands, conducting lubricants, swarf, or any other undesired conducting particles. Circuit resistance and continuity check should be made to make certain that there are no high resistance joints or spurious conducting paths. Always use the correct application tools as specified in the Data Sheet/Catalog. Do not permit untrained personnel to wire, assemble or tamper with connectors. For operation voltage please see appropriate national regulations.

IMPORTANT GENERAL INFORMATION

(i) Air and creepage paths/Operating voltage. The admissible operating voltages depend on the individual applications and the valid national and other applicable safety regulations. For this reason the air and creepage path data are only reference values. Observe reduction of air and creepage paths due to PC board and/or harnessing.

(ii) Temperature

All information given are temperature limits. The operation temperature depends on the individual application.

(iii) Other important information

Cannon continuously endeavors to improve their products. Therefore, Cannon products may deviate from the description, technical data and shape as shown in this catalog and data sheets. ITT Cannon manufactures the highest quality products available in the marketplace; however these products are intended to be used in accordance with the specifications in this publication. Any use or application that deviates from the stated operating specifications is not recommended and may be unsafe. No information and data contained in this publication shall be construed to create any liability on the part of Cannon. Any new issue of this publication shall automatically invalidate and supersede any and all previous issues.
