CT310

XtremeSense™ 2D TMR Angle Sensor

FEATURES AND BENEFITS

- Angle error less than 0.60° (after one-time compensation) over full temperature range
- Dual full-bridge resistor network
- Operating magnetic field: 250 to 900 G
- Differential outputs for SIN and COS axes
- Supply voltage: 1.0 to 5.5 V
- AEC-Q100 Grade 1
- Package options:
  - □ 8-lead TSSOP
  - □ 8-lead DFN, 2.00 mm × 2.00 mm × 0.45 mm

APPLICATIONS

- Angular measurements
- Rotary and angular sensors
- BLDC motors

DESCRIPTION

The CT310 is a 2D angle sensor in a dual full-bridge configuration from Allegro developed on its patented XtremeSense™ 2D tunnel magnetoresistance (TMR) technology. The operating magnetic field for this 2D sensor is 250 to 900 G and has an angle error less than 0.60° over temperature following a one-time offset and gain compensation. The sensitive axes of the TMR elements are orthogonal to each other, providing a 90° phase separation between the sine and cosine outputs when measured differentially. This phase separation is inherently independent of magnet pole spacing and air gap.

The CT310 is available in a 8-lead TSSOP package, and for space-critical applications, a low-profile and small form factor 8-lead DFN package that is 2.00 mm × 2.00 mm × 0.45 mm in size. The packages are RoHS compliant and lead (Pb) free with a 100% matte-tin-plated leadframe.

Storage Temperature	T_{STG}		–65 to 165	°C
Lead Soldering Temperature	T_L	10 seconds	260	°C

[1] Stresses exceeding the absolute maximum ratings may damage the CT310 and may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

[1] RoHS is defined as semiconductor products that are compliant to the current EU RoHS requirements. It also will meet the requirement that RoHS substances do not exceed 0.1% by weight in homogeneous materials. Green is defined as the content of chlorine (Cl), bromine (Br), and antimony trioxide based flame retardants satisfy JS709B low halogen requirements of ≤ 1,000 ppm.
[2] MSL Rating = Moisture Sensitivity Level Rating as defined by JEDEC standard classifications.
[3] Package will withstand ambient temperature range of –40°C to 150°C and storage temperature range of –65°C to 165°C.
[4] Device Marking for TSSOP is defined as CT310LS-XT8 YYWWSS where CT310LS = base part number, X = temperature code, T8 = TSSOP-8 package, YY = year, WW = work week, and SS = sequential number. DFN is defined as 300X where X = temperature code and Y = year, WW = work week, and S = sequential number.
