

**THE DATASHEET OF
PE-51687NL**

THT Current Sense Transformers & Inductors

-  VDE Approved
-  Designed for switching power supply applications
-  Transformer meets IEC950 insulation requirements
-  Frequency range from 20kHz to 200kHz

Electrical Specifications @ 25°C - Operating Temperature -40°C to +125°C

Notes:

1. Maximum ratings specified with rated secondary terminating resistance and 1 turn primary.
2. Amp-microsecond (AμSec.) rating of primary equals volt microsecond (VμSec.) rating of secondary when secondary is terminated in rated resistance. (Amp - microsecond is equal to the product of a square pulse of current in amps, times the current pulse width in microseconds).
3. Maximum operating temperature 105°C (ambient plus rise).
4. When terminated with rated terminating resistance, the inductor scale factor is $V_{out} = 1$ volt per amp. for center tapped units terminating resistance for each half of winding is listed value divided by two.
5. 1 turn primary peak sense current is 20 amps for all parts listed above.
