Inductors

For Power Line

SMD

RLF Series RLF7030 Type

Accompanying large current power supplies, these inductors have secured efficient characteristics by improving its magnetic circuit based on existing products. These products meet resistance reducing and current enlargement.

FEATURES

- Comparing with existing products(SLF7032), low loss (less than 80%) and large current capability (2.5 times) design.
- Using flat-square wire for winding, that is rising space factor, these inductors can reduce current resistance and suppress calorific value.
- Forming internal gap, their structure suppress outgoing magnetic flux leakage.
- Completely lead free for both inside of products and terminal electrodes.

APPLICATIONS

- Choke coils in power circuit of note book and mobile computers, DVD Player, VRM, Plasma Display, amusement equipments, etc.
