

THE DATASHEET OF UM4684EEUE

0.5Ω Low-Voltage Dual SPDT Analog Switch

UM4684H CSP10 2.0×1.5
UM4684EEUE MSOP10

General Description

The UM4684 is a sub 1Ω (0.5Ω at 2.7V) dual SPDT analog switch designed for low voltage applications.

The UM4684 has on-resistance matching (less than 0.05Ω at 2.7V) and flatness (less than 0.2Ω at 2.7V) that are guaranteed over the entire voltage range. Additionally, low logic thresholds make the UM4684 an ideal interface to low voltage DSP control signals.

The UM4684 has fast switching speed with break-before-make guaranteed. In the ON condition, all switching elements conduct equally in both directions. OFF-isolation and crosstalk is -69dB at 100kHz.

The UM4684 is built on high-density low voltage CMOS process, and contains the additional benefit of 2000V ESD protection.

As a committed partner to the community and the environment, Union manufactures this product with lead (Pb)-free device terminations.

Applications

- Cellular Phones
- Speaker Headset Switching
- Audio and Video Signal Routing
- PCMCIA Cards
- Battery Operated Systems
- Relay Replacement
- Power Routing
- Communication Circuits

Features

- CSP10 & MSOP10 Packages
- ESD Protection >2000V
- +1.8V to +5.5V Single Supply Operation
- NC Switch R_{ON}: 0.5Ω (+2.7V Supply)
- NO Switch R_{ON}: 0.6Ω (+2.7V Supply)
- R_{ON} Match between Channels: 0.05Ω Max (+2.7V Supply)
- R_{ON} Flatness over Signal Range: 0.2Ω Max (+2.7V Supply)
- 1.8V Logic Compatibility
- Low Crosstalk: -69dB (100kHz)
- High Off-Isolation: -69dB (100kHz)

Ordering Information

| Part Number | Temp. Range | Packaging Type | Marking Code | Shipping Qty |
|-------------|---------------|----------------|--------------|-----------------------------|
| UM4684H | -40°C to 85°C | CSP10 2.0×1.5 | A | 3000pcs/7 Inch Tape & Reel |
| UM4684EEUE | -40°C to 85°C | MSOP10 | UM4684EEUE | 4000pcs/13 Inch Tape & Reel |

Pin Description

| Pin Name | Pin Number | | Function |
|----------|------------------|--------|--|
| | CSP10 2.0×1.5 | MSOP10 | |
| NC_ | A1, C1 | 5, 7 | Analog Switch—Normally Closed Terminal |
| IN_ | A2, C2 | 4, 8 | Digital Control Input |
| COM_ | A3, C3 | 3, 9 | Analog Switch—Common Terminal |
| NO_ | A4, C4 | 2, 10 | Analog Switch—Normally Open Terminal |
| V+ | B4 | 1 | Positive Supply Voltage Input |
| GND | B1 | 6 | Ground |

Function Table

| | | |
|-----|-----|-----|
| IN_ | NO_ | NC_ |
| 0 | OFF | ON |
| 1 | ON | OFF |

Absolute Maximum Ratings (Note 1)

| Parameter | Value | Unit | |
|--|-------------------------------|------|----|
| Voltage on V+ Pin (Reference to GND) | -0.3 to +6 | V | |
| Voltage on IN_, COM_, NC_, NO_ Pins (Note 2) (Reference to GND) | -0.3 to (V ₊ +0.3) | V | |
| Continuous Current (NO_, NC_, COM_) | ±300 | mA | |
| Peak Current (Pulsed at 1 ms, 10% Duty Cycle) | ±500 | mA | |
| Storage Temperature | -65 to 150 | °C | |
| Package Solder Reflow Conditions (Note 3) | IR/Convection | 250 | °C |
| | ESD per Method 3015.7 | >2 | kV |
| Power Dissipation (Packages) (Note 4) | CSP10 (Note 5) | 457 | mW |

Note 1: Stresses beyond those listed under “Absolute Maximum Ratings” may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications are not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

Note 2: Signals on NC_, NO_, or COM_ or IN_ exceeding V₊ will be clamped by internal diodes. Limit forward diode current to maximum current ratings.

Note 3: Refer to IPC/JEDEC (J-STD-020B).

Note 4: All bumps welded or soldered to PC Board.

Note 5: Derate 5.7mW/°C above 70°C.

Electrical Characteristics ($V_+=3V$, $\pm 10\%$ deviation, $V_{IN}=0.5$ or $1.4V$ (Note 6))

| Parameter | Symbol | Test Conditions Otherwise Unless Specified | Temp (Note 7) | Limits (-40°C to 85°C) | | | Unit |

Note 6. V_{IN} =input voltage to perform proper function.

Note 7. Room=25°C, Full=as determined by the operating suffix.

Note 8. Typical values are for design aid only, not guaranteed nor subjected to production testing.

Note 9. The algebraic convention whereby the most negative value is a minimum and the most positive a maximum, is used in this datasheet.

Note 10. Guaranteed by design, nor subjected to production testing.

Applications Information

Digital Control Inputs

The UM4684 logic inputs accept up to +5.5V regardless of supply voltage. For example, with a +3.3V supply, IN_ may be driven low to GND and high to 5.5V. Driving IN_ rail-to-rail minimizes power consumption. Logic levels for a +1.8V supply are 0.5V (low) and 1.4V (high).

Analog Signal Levels

Analog signals that range over the entire supply voltage (V+ to GND) is passed with very little change in on-resistance (see Typical Operating Characteristics). The switches are bidirectional, so the NO_, NC_, and COM_ pins can be either inputs or outputs.

Caution

Do not exceed the absolute maximum ratings because stresses beyond the listed ratings may cause permanent damage to devices.

Proper power-supply sequencing is recommended for all CMOS devices. Always apply V+ before applying analog signals, especially if the analog signal is not current limited. If this sequencing is not possible, and if the analog inputs are not current limited to <20mA, add a small signal diode (D1) as shown in Figure 6. Adding a protection diode reduces the analog range to a diode drop (about 0.7V) below V+ (for D1). RON increases slightly at low supply voltages. Maximum supply voltage (V+) must not exceed +6V. Protection diode D1 also protects against some over voltage situations. No damage will result on Figure 6's circuit if the supply voltage is below the absolute maximum rating applied to an analog signal pin.

GREEN COMPLIANCE

Union Semiconductor is committed to environmental excellence in all aspects of its operations including meeting or exceeding regulatory requirements with respect to the use of hazardous substances. Numerous successful programs have been implemented to reduce the use of hazardous substances and/or emissions.

All Union components are compliant with the RoHS directive, which helps to support customers in their compliance with environmental directives. For more green compliance information, please visit:
