BASIC BOARD MOUNT PRESSURE SENSORS

32307741
Issue D

TBP Series: Compensated/Unamplified

60 mbar to 10 bar | 6 kPa to 1 MPa | 1 psi to 150 psi,
Millivolt Analog Output

NBP Series: Uncompensated/Unamplified

60 mbar to 10 bar | 1 psi to 150 psi,
Millivolt Analog Output

DESCRIPTION

Honeywell's Basic Board Mount Pressure Sensors, TBP Series and NBP Series, are designed for food grade and non-food grade potential medical and industrial applications. These unamplified, piezoresistive silicon pressure sensors provide a ratiometric output and are either temperature compensated (TBP Series) or uncompensated (NBP Series).

TBP Series:

- Temperature compensated and unamplified.
- Compensation makes it easier to integrate the sensor into a system by minimizing the need to calibrate the system over temperature on a regular basis; offers reduced part-to-part variation.
- Offers multitude of resolutions of the pressure signal.
- Compensated temperature range is 0°C to 85°C [-32°F to 185°F].

NBP Series:

- Uncompensated and unamplified.
- Is often ideal for customers who want to do their own compensation, calibration and amplification in order to make use of the maximum resolution of the bare sensor output, leveraging any algorithm needed for the application.
- Offers multitude of resolutions of the pressure signal.

These products are available in numerous package styles and mounting options, making it easier for device manufacturers to integrate the product into their applications. They are intended for use with non-corrosive, non-ionic gases, such as air and other dry gases, and for non-corrosive, non-ionic liquids when the silicone gel coating option is selected. All products are designed and manufactured according to ISO 9001 and are NSF certified. Specific configurations are food grade certified. Consult the factory for food grade options.

VALUE TO CUSTOMERS

- Cost-competitive pressure sensing solution
- Smaller when compared to many

similar products, occupying less space on the printed circuit board (PCB) and typically allowing for easier placement on PCBs or in small devices

- Performs in many tough environments with dry and wetted media
- Numerous options simplify integration into the device manufacturer's application
- Food Safety Certification for North America, Europe and Asia

FEATURES

- Package size as small as 7 mm x 7 mm [0.276 in x 0.276 in]
- Operating temperature range -40°C to 125°C [-40°F to 257°F]
- Reflow mounting J-STD-020E, MSL 1 and rapid stabilization after reflow soldering allow calibration immediately after mounting
- Media compatibility options:
 - **No gel coating in media path:** Input port is limited to non-corrosive, non-ionic media such as dry air and gases and should not be exposed to condensation; gases are limited to media that are compatible with high temperature polyamide, silicone, alumina ceramic, silicon, gold and glass
 - **Silicone gel coating in media path:** Uses the same materials in the wetted media path but is protected from condensation by a silicone-based gel coating; allows for use in applications where condensation can occur
- For selective configurations, sensor materials have been tested and certified for these food safety standards (applies to specific configurations only):
 - NSF-169
 - BPA Free
 - LFGB

POTENTIAL APPLICATIONS

- **Medical:** Blood pressure monitoring, hospital beds, oxygen concentrators, wound therapy
- **Industrial:** Air movement control, environmental control, HVAC transmitters, industrial controls, leak detection, other commercial applications, pneumatic controls, food and beverage

TABLE 1. OPERATING SPECIFICATIONS

| CHARACTERISTIC | MIN. | TYP. | MAX. | UNIT |
|---|-----------|------|-----------|------------------------|
| TBP SERIES | | | | |
| Supply voltage (V_{supply}) ^{1,2} | 1.5 | 5.0 | 12.0 | Vdc |
| Supply current (at 5.0 Vdc supply) | – | 0.6 | 1 | mA |
| Operating temperature range ³ | -40 [-40] | – | 125 [257] | °C [°F] |
| Compensated temperature range ⁴ | 0 [32] | – | 85 [185] | °C [°F] |
| Output resistance | – | 2.5 | – | kOhm |
| NBP SERIES | | | | |
| Supply voltage (V_{supply}) ^{1,2} | 1.8 | 5.0 | 12.0 | Vdc |
| Supply current (at 5.0 Vdc supply) | – | 1.5 | 2.5 | mA |
| Specified temperature range ⁵ | -40 [-40] | – | 125 [257] | °C [°F] |
| Accuracy ⁶ | – | – | ±0.25 | %FSS BFSL ⁷ |
| Input resistance | 2.4 | 3.0 | 5.5 | kOhm |
| Thermal effect on resistance (TER) ⁸ | 1200 | – | 3200 | ppm/°C |

¹Ratiometricity of the sensor (the ability of the device output to scale to the supply voltage) is achieved within the specified operating voltage.

²Incorrect application of supply voltage or ground to the wrong pin may cause electrical failure.

³**Operating temperature range:** The temperature range over which the sensor produces an output proportional to pressure.

⁴**Compensated temperature range:** The temperature range over which the sensor produces an output proportional to pressure within the specified performance limits.

⁵**Specified temperature range:** The temperature range over which the sensor will produce an output proportional to pressure within the specified performance limits.

⁶**Accuracy:** The maximum deviation in output from a Best Fit Straight Line (BFSL) fitted to the output measured over the pressure range at 25°C [77°F]. Includes all errors due to pressure non-linearity, pressure hysteresis, and non-repeatability.

⁷**Full Scale Span (FSS):** The algebraic difference between the output signal measured at the maximum and minimum limits of the pressure range. (See Figure 2 for pressure ranges.)

⁸**TER (Thermal Effect on Resistance):** The deviation in input resistance due to change in temperature over the specified temperature range, relative to input resistance measured at 25°C [77°F].

TABLE 2. PRESSURE REFERENCE TYPES

| PRESSURE TYPE | DESCRIPTION |
|---------------|---|
| Absolute | Output is proportional to the difference between applied pressure and a built-in reference to vacuum. Reference pressure is absolute zero pressure (full vacuum). |
| Differential | Output is proportional to the difference between the pressures applied to each port (Port 1 - Port 2). |
| Gage | Output is proportional to the difference between applied pressure and atmospheric (ambient) pressure. Reference pressure is atmospheric pressure. |

TBP SERIES AND NBP SERIES BASIC BOARD MOUNT PRESSURE SENSORS

TABLE 3. ABSOLUTE MAXIMUM RATINGS¹

| CHARACTERISTIC | MIN. | MAX. | UNIT |
|---|-----------|---|---------|
| Supply voltage (V_{supply}) | -12.0 | 12.0 | Vdc |
| Storage temperature | -40 [-40] | 125 [257] | °C [°F] |
| Soldering time and temperature: lead solder temperature (DIP) peak reflow temperature (SMT, Leadless SMT) | | 4 s max. at 250°C [482°F] 15 s max. at 250°C [482°F] | |

¹Absolute maximum ratings are the extreme limits the device will withstand without damage.

TABLE 4. ENVIRONMENTAL SPECIFICATIONS

| CHARACTERISTIC | PARAMETER |
|--|--|
| Humidity: all external surfaces internal surfaces of silicone gel coating option internal surfaces of no gel coating option | 0 %RH to 95 %RH, non-condensing 0 %RH to 100 %RH, condensing 0 %RH to 95 %RH, non-condensing |
| Vibration | MIL-STD-202G, Method 204D, Condition B (15 g, 10 Hz to 2 kHz) |
| Shock | MIL-STD-202G, Method 213B, Condition C (100 g, 6 ms duration) |
| Life ¹ | 1 million pressure cycles min. |
| ESD | MIL-STD-883 Method 3015.7 |
| Solder reflow | J-STD-020E, MSL 1, unlimited storage life |
| Certification (silicone gel coating option: Port 1 only) | NSF- 169, BPA Free, LFGB |

¹Life may vary depending on specific application in which the sensor is utilized.

TABLE 5. WETTED MATERIALS¹

| COMPONENT | PRESSURE PORT 1 (P1) | | PRESSURE PORT 2 (P2) |
|-----------------------|--|---|----------------------|
| | NO GEL COATING IN MEDIA PATH | SILICONE GEL COATING IN MEDIA PATH (FOOD GRADE) | |
| Ports and covers | high temperature polyamide | | |
| Substrate | alumina ceramic | – | alumina ceramic |
| Adhesives | epoxy, silicone | epoxy, silicone gel | epoxy, silicone |
| Electronic components | silicon, gold, glass, solder, aluminum | 304SST | silicon |

¹Contact Honeywell Customer Service for detailed material information.

CAUTION MISUSE OF GEL COATING OPTION

- **No gel coating in media path:** The input port is limited to non-corrosive, non-ionic media such as dry air and gases and should not be exposed to condensation. The gases are limited to media which are compatible with the following wetted materials of construction: high temperature polyamide, silicone, alumina ceramic, silicon, gold, and glass.
- **Silicone gel coating in media path:** The gel coated sensors use the same materials in the wetted media path but are protected from condensation by a silicone-based gel coating. The gel coating option allows use in applications where condensation can occur.

Failure to comply with these instructions may result in product damage.

¹**Overpressure:** The maximum pressure which may safely be applied to the product for it to remain within specifications once pressure is returned to the operating pressure range. Exposure to higher pressures may cause permanent damage to the product. Unless otherwise specified, this applies to all available pressure ports at any temperature within the operating temperature range.

²**Burst pressure:** The maximum pressure that may be applied to the specified port (P1 or P2) of the product without causing escape of pressure media. Product should not be expected to function after exposure to any pressure beyond the burst pressure.

³**Common mode pressure:** The maximum pressure that can be applied simultaneously to both ports of a differential pressure sensor without causing changes in specified performance.

⁴**Accuracy:** The maximum deviation in output from a Best Fit Straight Line (BFSL) fitted to the output measured over the pressure range at 25°C. Includes all errors due to pressure non-linearity, pressure hysteresis, and non-repeatability.

⁵**Offset:** The output signal obtained when the reference pressure is applied to all available pressure ports. Also known as "null" or "zero".

⁶**Full Scale Span:** The algebraic difference between the output signal measured at the maximum and minimum limits of the pressure range (see Figure 1) for pressure ranges).

⁷**Thermal effect on offset:** The deviation in offset due to changes in temperature over the compensated temperature range, relative to offset measured at 25°C.

⁸**Thermal effect on span:** The deviation in full scale span due to changes in temperature over the compensated temperature range, relative to full scale span measured at 25°C.

⁹**Thermal hysteresis:** The maximum difference between output readings when the same temperature is reached consecutively, under the same operating conditions, with temperature approaching from opposite directions within the operating temperature range. Validated over the full operating temperature and pressure ranges using a ~5°C/minute ramp and 30 minute dwell. Application performance may be affected by thermal mass of end user system.

¹**Overpressure:** The maximum pressure which may safely be applied to the product for it to remain within specifications once pressure is returned to the operating pressure range. Exposure to higher pressures may cause permanent damage to the product. Unless otherwise specified, this applies to all available pressure ports at any temperature within the operating temperature range.

²**Burst pressure:** The maximum pressure that may be applied to the specified port (P1 or P2) of the product without causing escape of pressure media. Product should not be expected to function after exposure to any pressure beyond the burst pressure.

³**Common mode pressure:** The maximum pressure that can be applied simultaneously to both ports of a differential pressure sensor without causing changes in specified performance.

⁴**Accuracy:** The maximum deviation in output from a Best Fit Straight Line (BFSL) fitted to the output measured over the pressure range at 25°C. Includes all errors due to pressure non-linearity, pressure hysteresis, and non-repeatability.

⁵**Offset:** The output signal obtained when the reference pressure is applied to all available pressure ports. Also known as “null” or “zero”.

⁶**Full Scale Span:** The algebraic difference between the output signal measured at the maximum and minimum limits of the pressure range (see Figure 1) for pressure ranges).

⁷**Thermal effect on offset:** The deviation in offset due to changes in temperature over the compensated temperature range, relative to offset measured at 25°C.

⁸**Thermal effect on span:** The deviation in full scale span due to changes in temperature over the compensated temperature range, relative to full scale span measured at 25°C.

⁹**Thermal hysteresis:** The maximum difference between output readings when the same temperature is reached consecutively, under the same operating conditions, with temperature approaching from opposite directions within the operating temperature range. Validated over the full operating temperature and pressure ranges using a ~5°C/ minute ramp and 30 minute dwell. Application performance may be affected by thermal mass of end user system.

¹**Overpressure:** The maximum pressure which may safely be applied to the product for it to remain within specifications once pressure is returned to the operating pressure range. Exposure to higher pressures may cause permanent damage to the product. Unless otherwise specified, this applies to all available pressure ports at any temperature within the operating temperature range.

²**Burst pressure:** The maximum pressure that may be applied to the specified port (P1 or P2) of the product without causing escape of pressure media. Product should not be expected to function after exposure to any pressure beyond the burst pressure.

³**Common mode pressure:** The maximum pressure that can be applied simultaneously to both ports of a differential pressure sensor without causing changes in specified performance.

⁴**Offset:** The output signal obtained when the reference pressure is applied to all available pressure ports. Also known as “null” or “zero”.

⁵**TCO (Thermal Effect on Offset):** The deviation in offset due to changes in temperature over the specified temperature range, relative to offset measured at 25°C.

⁶**TCS (Thermal Effect on Span):** The deviation in full scale span due to changes in temperature over the specified temperature range, relative to full scale span.

| TABLE 11. FOOD GRADE REGULATIONS | |
|----------------------------------|--|
| NAME | DESCRIPTION |
| 32309475-00A | South Korea Food Grade Regulation Certificate for SS304 |
| 32309475-00B | SS304 Food Grade Regulation Certificate - Europe, France, Italy, Germany (LFGB), Netherlands, Finland, Norway, Denmark, Switzerland, Sweden. Note: Australia follows EU or USA FDA food grade regulations. |
| 32327768-00A | South Korea Food Grade Regulation Certificate for silpuran2130 gel |
| 32327768-00B | SILPURAN 2130 Food Grade Regulation Certificate - Europe, France, Italy, Germany (LFGB), Netherlands, Finland, Norway, Denmark, Switzerland, Sweden. Note: Australia follows EU or USA FDA food grade regulations |
| 32327768-00C | SILPURAN 2130 A & B Gel FDA letter |
| 32332678-00A | South Korea Food Grade Regulation Certificate for High temp Nylon based plastic |
| 32332678-00B | Plastic Part Food Grade Regulation Certificate- Europe, France, Italy, Germany(LFGB), Netherlands, Finland, Norway, Denmark, Switzerland, Sweden. Note: Australia follows EU or USA FDA food grade regulations |
| 32332678-00C | Nylon resin Zytal HTNFG52G35HSLR BK011 FDA letter |
| 32339019-00A | South Korea Food Grade Regulation Certificate for GL107 adhesive |
| 32339019-00B | GL107 adhesive BPA Free test certificate as per French decree |
| 32339019-00C | GL107 adhesive Food Grade Regulation Certificate - Europe, France, Italy, Germany(LFGB), Netherlands, Finland, Norway, Denmark, Switzerland, Sweden. Note: Australia follows EU or USA FDA food grade regulations. |
| 32339019-00D | GL 107 penchem Adhesive FDA letter |
| 32340305-00A | EB350 adhesive BPA Free test certificate as per French decree |
| 32347956 | EU General Food Grade Regulation certificate for NBP, TBP, ABP, ABP2, MPR, ISC series |
| 32347957 | Food Grade Regulation Certificate from Europe, France, Italy, Germany(LFGB), Netherlands, Finland, Norway, Denmark, Switzerland, Sweden for NBP, TBP, ABP, ABP2, MPR, ISC series. Note: Australia follows EU or USA FDA food grade regulations. |
| 32347958 | Singapore Food Grade Regulation Certificate for NBP, TBP, ABP, ABP2, MPR, ISC series |
| 32347959 | NBP/TBP product BPA free test certificate as per French decree |
| 32347960 | NSF-169-C0280766 for NBP, TBP, ABP, ABP2, MPR, ISC series |
| 32347961-00A | China Food Grade Regulation Certificate for TFN, SS304 gel ring and plastic part |
| 32347961-00B | China Food Grade Regulation Certificate for GL107 adhesive, RTV6424 adhesive and SILPURAN 2130 gel part |
| 32347962-00A | Japan Food Grade Regulation Certificate for TFN, SS304 gel ring and high temp nylon based plastic part |
| 32347962-00B | Japan Food Grade Regulation Certificate for GL107adhesive, RTV6424 adhesive and SILPURAN 2130 gel part |
| 50039078-00A | South Korea Food Grade Regulation Certificate for RTV6424 adhesive |
| 50039078-00B | RTV6424 adhesive Food Grade Regulation Certificate - Europe, France, Italy, Germany (LFGB), Netherlands, Finland, Norway, Denmark, Switzerland, Sweden. Note: Australia follows EU or USA FDA food grade regulations. |
| 50039078-00C | RTV6424 Adhesive FDA letter |
| 50071551-00A | South Korea Food Grade Regulation Certificate for ceramic alumina (TFN) |
| 50071551-00B | TFN Food Grade Regulation Certificate - Europe, France, Italy, Germany (LFGB), Netherlands, Finland, Norway, Denmark, Switzerland, Sweden. Note: Australia follows EU or USA FDA food grade regulations. |
| 32339019-00E | GL107 adhesive pthalates_Reach and RoHS compliance certificate |
| 32327768-00D | SILPURAN 2130 adhesive pthalates_Reach and RoHS compliance certificate |

WARRANTY/REMEDY

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship during the applicable warranty period. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgment or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items that Honeywell, in its sole discretion, finds defective.

The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.

While Honeywell may provide application assistance personally, through our literature and the Honeywell web site, it is buyer's sole responsibility to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this writing. However, Honeywell assumes no responsibility for its use.

WARNING PERSONAL INJURY

DO NOT USE these products as safety or emergency stop devices or in any other application where failure of the product could result in personal injury.

Failure to comply with these instructions could result in death or serious injury.

WARNING MISUSE OF DOCUMENTATION

- The information presented in this product sheet is for reference only. Do not use this document as a product installation guide.
- Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.

Failure to comply with these instructions could result in death or serious injury.
