

THE DATASHEET OF SG2803DW

High Voltage Medium Current Driver Arrays

Description

The SG2800 series integrates eight NPN Darlington pairs with internal suppression diodes to drive lamps, relays, and solenoids in many military, aerospace, and industrial applications that require severe environments.

All units feature open collector outputs with greater than 50V breakdown voltages combined with 500mA current carrying capabilities.

Five different input configurations provide optimized designs for interfacing with DTL, TTL, PMOS, or CMOS drive signals.

These Darlington array are designed to operate from -55°C to 125°C ambient temperature in a 18-pin dual in-line ceramic (J) package and 20-pin leadless chip carrier (LCC).

In addition a plastic version is available in 18 lead SOWB (DW) package with a reduced temperature range of 0°C to 70°C.

Features

- Eight NPN Darlington Pairs
- Collector Currents to 600mA
- Output Voltages from 50V to 95V
- Internal Clamping Diodes for Inductive loads
- DTL, TTL, PMOS, or CMOS Compatible inputs

High Reliability Features

- Available To MIL-STD-883 – 883, ¶ 1.2.1
- Available to DSCC
 - Standard Microcircuit Drawing (SMD)
- MIL-M38510/14106BVA - SG2801J-JAN
- MIL-M38510/14107BVA - SG2802J-JAN
- MIL-M38510/14108BVA - SG2803J-JAN
- MIL-M38510/14109BVA - SG2804J-JAN
- MSC-AMS Level "S" Processing Available

Schematics (each Darlington pair)

Figure 1 - Schematics (showing each Darlington pair)

Connection Diagrams and Ordering Information

| Ambient Temperature | Type | Package | Part Number | Packaging Type | Connection Diagram |

Hermetic Packages J, L use Pb37/Sn63 hot solder lead finish, contact factory for availability of RoHS versions. | | | | | |

Absolute Maximum Ratings¹

| Parameter | Value | Units |
|--|--------------|-------|
| Output Voltage, V_{CE} (SG2800, 2810 series) | 50 | V |
| (SG2820 series) | 95 | V |
| Input Voltage, V_{IN} (SG2802,3,4 series) | 30 | V |
| Continuous Input Current, I_{IN} | 25 | mA |
| Continuous Collector Current, I_C (SG2800, 2820) | 500 | mA |
| (SG2810) | 600 | mA |
| Operating Junction Temperature | | |
| Plastic (DW Package) | 150 | °C |
| Hermetic (J, L Packages) | 150 | °C |
| Storage Temperature Range | -65 to 150 | °C |
| Lead Temperature (Soldering 10 sec.) | 300 | °C |
| RoHS Peak Package Solder Reflow Temperature (40 sec. max. exp.) | 260 (+0, -5) | °C |
| Note: 1. Exceeding these ratings could cause damage to the device. All voltages are with respect to ground. Currents are positive into, negative out of specified terminal. | | |

Thermal Data

| Parameter | Value | Units |
|---|-------|-------|
| J Package | | |
| Thermal Resistance-Junction to Case, θ_{JC} | 25 | °CW |
| Thermal Resistance-Junction to Ambient, θ_{JA} | 70 | °CW |
| L Package | | |
| Thermal Resistance-Junction to Case, θ_{JC} | 35 | °CW |
| Thermal Resistance-Junction to Ambient, θ_{JA} | 120 | °CW |
| DW Package | | |
| Thermal Resistance-Junction to Ambient, θ_{JA} | 90 | °CW |
| Note: <ol style="list-style-type: none"> Junction Temperature Calculation: $T_J = T_A + (P_D \times \theta_{JA})$. The above numbers for θ_{JC} are maximums for the limiting thermal resistance of the package in a standard mounting configuration. The θ_{JA} numbers are meant to be guidelines for the thermal performance of the device/pcboard system. All of the above assume no ambient airflow. | | |

Recommended Operating Conditions¹

| Symbol | Parameter | Recommended Operating Conditions | | | Units |
|--------------------------------------|--|----------------------------------|------|------|-------|
| | | Min. | Typ. | Max. | |
| V _{CE} | Output Voltage | | | | |
| | SG2800, SG2820 series | | | 50 | V |
| | SG2810 series | | | 95 | V |
| I _C | Peak Collector Current, I _C | | | | |
| | SG2800, SG2820 series | | | 350 | mA |
| | SG2810 series | | | 500 | mA |
| Operating Ambient Temperature Range: | | | | | |
| | J, L Packages | -55 | | 125 | °C |
| | DW Packages | 0 | | 70 | °C |

Note: 1. Range over which the device is functional.

Selection Guide

| Device | V _{CE} Max | I _C Max | Logic Inputs |
|--------|---------------------|--------------------|----------------------------|
| SG2801 | 50V | 500mA | General Purpose PMOS, CMOS |
| SG2802 | | | 14V-25V PMOS |
| SG2803 | | | 5V TTL, CMOS |
| SG2804 | | | 6V-15V CMOS, PMOS |
| SG2811 | | | General Purpose PMOS, CMOS |
| SG2812 | 600mA | 600mA | 14V-25V PMOS |
| SG2813 | | | 5V TTL, CMOS |
| SG2814 | | | 6V-15V CMOS, PMOS |
| SG2815 | | | High Output TTL |
| SG2821 | | | 95V |
| SG2823 | 5V TTL, CMOS | | |
| SG2824 | 6V-15V CMOS, PMOS | | |

Electrical Characteristics

(Unless otherwise specified, these specifications apply over the operating ambient temperatures of $-55^{\circ}\text{C} \leq T_A \leq 125^{\circ}\text{C}$, for the J & L devices and $0^{\circ}\text{C} \leq T_A \leq 70^{\circ}\text{C}$, for the DW device. Low duty cycle pulse testing techniques are used which maintains junction and case temperatures equal to the ambient temperature.)

Table 1 - SG2801 thru SG2804

| Symbol | Parameter | Applicable Devices | Temp. | Test Conditions | Limits | | | Units | |
|-----------------------------------|--|--------------------|-----------------------------------|--|--------|------|------|-------|---|

Microsemi Corporation (Nasdaq: MSCC) offers a comprehensive portfolio of semiconductor and system solutions for communications, defense & security, aerospace and industrial markets. Products include high-performance and radiation-hardened analog mixed-signal integrated circuits, FPGAs, SoCs and ASICs; power management products; timing and synchronization devices and precise time solutions, setting the world's standard for time; voice processing devices; RF solutions; discrete components; security technologies and scalable anti-tamper products; Power-over-Ethernet ICs and midspans; as well as custom design capabilities and services. Microsemi is headquartered in Aliso Viejo, Calif., and has approximately 3,400 employees globally. Learn more at www.microsemi.com.

Microsemi makes no warranty, representation, or guarantee regarding the information contained herein or the suitability of its products and services for any particular purpose, nor does Microsemi assume any liability whatsoever arising out of the application or use of any product or circuit. The products sold hereunder and any other products sold by Microsemi have been subject to limited testing and should not be used in conjunction with mission-critical equipment or applications. Any performance specifications are believed to be reliable but are not verified, and Buyer must conduct and complete all performance and other testing of the products, alone and together with, or installed in, any end-products. Buyer shall not rely on any data and performance specifications or parameters provided by Microsemi. It is the Buyer's responsibility to independently determine suitability of any products and to test and verify the same. The information provided by Microsemi hereunder is provided "as is, where is" and with all faults, and the entire risk associated with such information is entirely with the Buyer. Microsemi does not grant, explicitly or implicitly, to any party any patent rights, licenses, or any other IP rights, whether with regard to such information itself or anything described by such information.
