FLZ CONNECTOR

Connectors for FFC and FPC

This extremely small 0.5mm (.020") pitch connector with a height of only 2.0mm (.079") above the PCB surface allows interconnection in extremely small spaces and is an example of JST's leading edge technology.

Features

• Zero insertion force mechanism

A ZIF mechanism increases wear resistance and extends the connector's mating life.

• Heat resistant design suitable for surface mounting

This housing is made of heat resistant plastic to allow reflow soldering.

• In-line surface mount tails

Has an in-line surface mount tails for easy inspection.

• Two types of connections

The connector is available in either the normal or reverse configurations. The FFC/FPC is positioned with its mating surfaces facing upward for the normal configured connector, while the reverse configuration requires that the FFC/FPC be positioned with its mating surfaces facing down. The engineer has greater freedom in designing his circuitry.

• Embossed tape for automatic mounting

The FLZ connector can be packaged in embossed tape for automatic mounting.
