#### Precautions:

##### Cleaning

- Optek recommends isopropyl alcohol be used as a solvent for cleaning the LEDs. When using other solvents, it should be confirmed beforehand whether the solvents will dissolve the package and/or the resin. Freon solvents should not be used to clean LEDs because of worldwide regulations.
- Do not use ultrasonic methods.

##### Safety

- LED light output is strong enough to cause injury to the human eye. Precaution must be taken to avoid looking directly into the LEDs with unprotected eyes for more than a few seconds.
- Flashing lights have been known to cause discomfort in people. This can be prevented by taking precautions during operation.
